

Plastics Recyclers Europe's Use of Cookies

Plastics Recyclers Europe's (PRE's) websites and online services may use "cookies." Cookies enable the data subject to use our online tools, and to personalize the experience on our web pages, providing for statistics on the number of visits for each page, help us measure the effectiveness of our communication's efforts, and give us insights into data subjects' behaviour so we can improve our communications and services.

Data subjects can prevent websites to trace their navigation history by disabling cookies on their browsers. Learn more about how you can control cookies [here](#).

Because cookies are used throughout our websites, disabling them may prevent data subjects to benefit from our online tools, as certain parts of the sites may require the use of cookies.

We use the following categories of cookies on our websites and other online services:

Category 1 — Strictly Necessary Cookies

These cookies are essential to enable data subjects to browse around our websites and use their features. Without these cookies, services like RecyClass and EuCertPlast for instance, might not work properly.

Category 2 — Performance Cookies

These cookies collect information about how data subjects use our websites — for instance, the most accessed pages. This data may be used to help optimize our websites and make them easier for data subjects to navigate. These cookies are also used to let affiliates know if data subjects came to one of our websites from an affiliate and if data subjects' visit resulted in the use of a service from us, including details of the service.

These cookies do not collect information that identifies data subjects. All information these cookies collect is aggregated and therefore anonymous.

Category 3 — Functionality Cookies

These cookies allow our websites to remember choices data subjects make while browsing. For instance, we may store the username data subjects used the last time they visited our webpages. We may also remember preferences such as text size, fonts, and other customizable site elements.

The information these cookies collect will not personally identify data subjects, and they cannot track data subjects' browsing activity on non-PRE's websites.
